

# Using LLDB in iOS

Using Chisel

# Chisel

---

- ⚙️ Install from github

<https://github.com/facebook/chisel>

```
command script import /path/to/fblldb.py
```

- ⚙️ Install from the command line

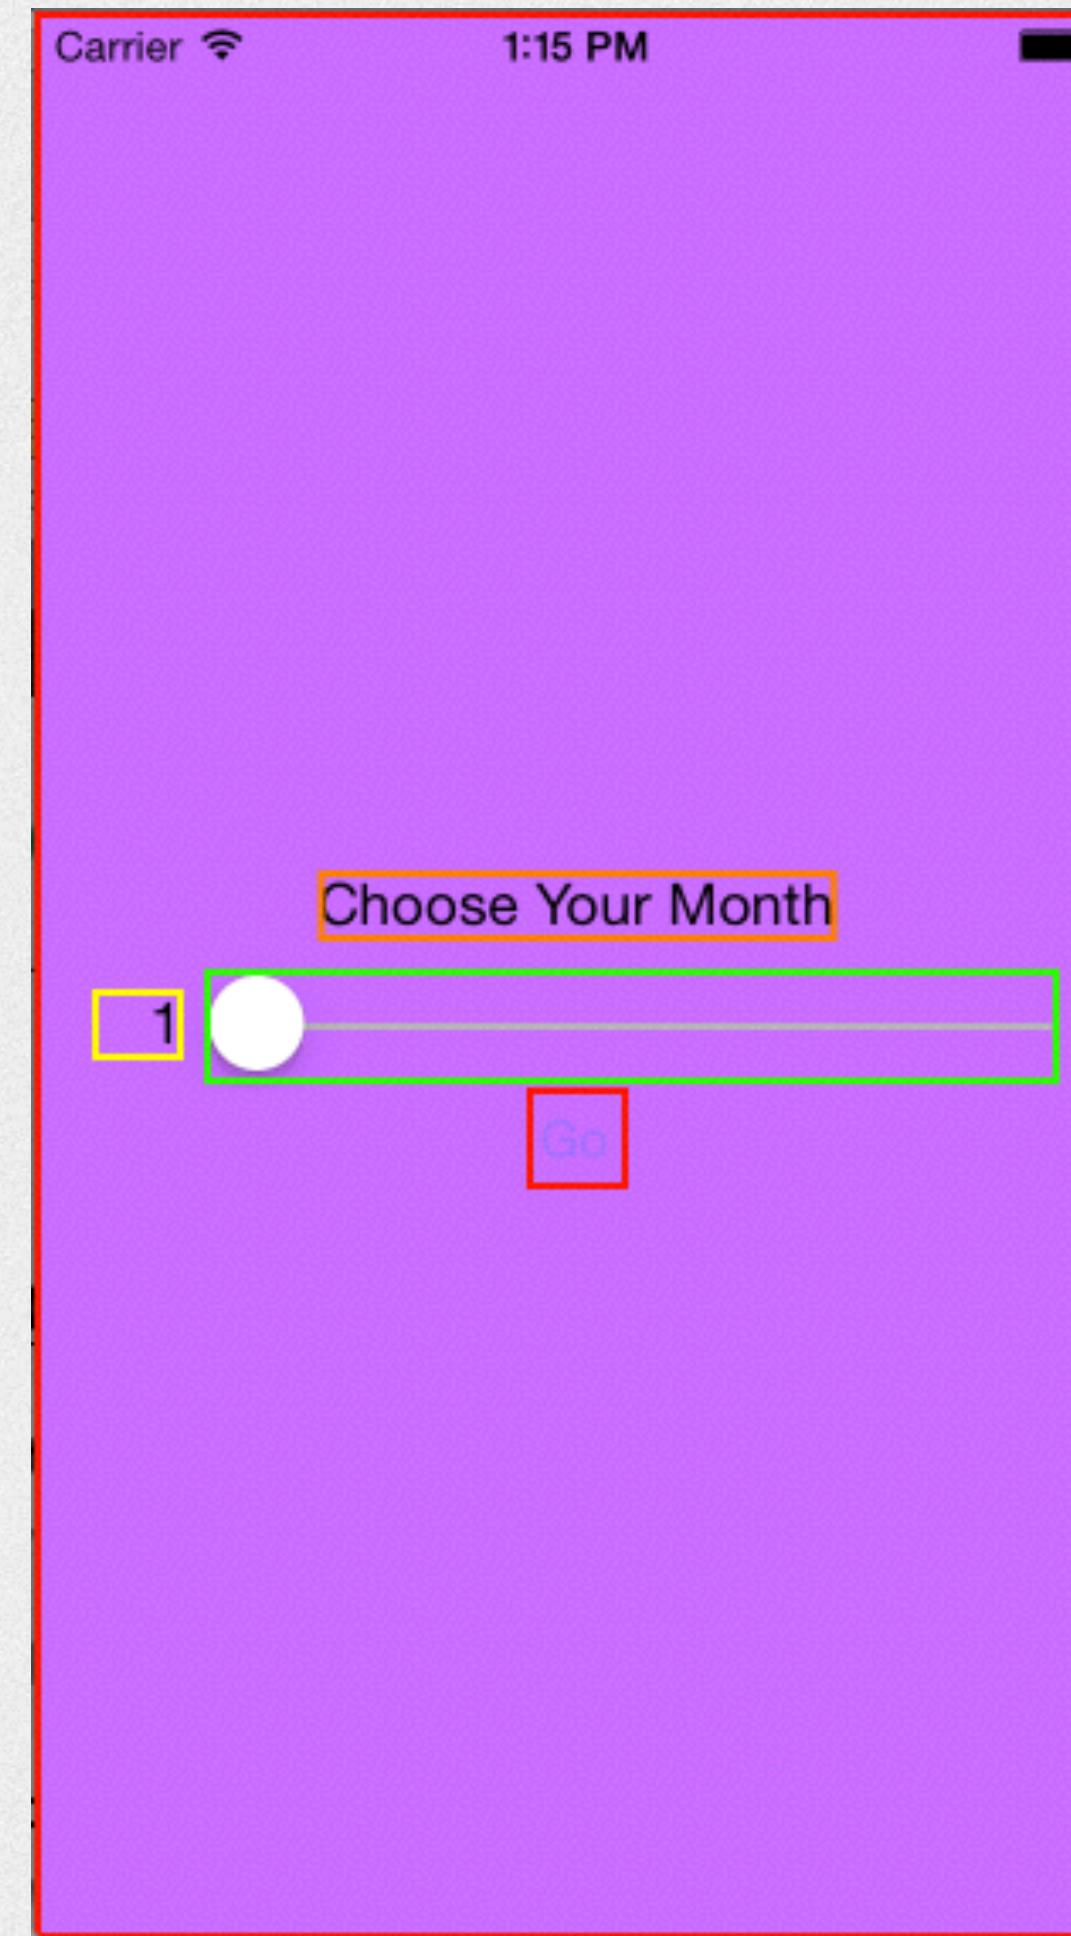

```
brew update
```

```
brew install chisel
```

```
command script import /usr/local/Cellar/chisel/1.0.0/libexec/fblldb.py
```

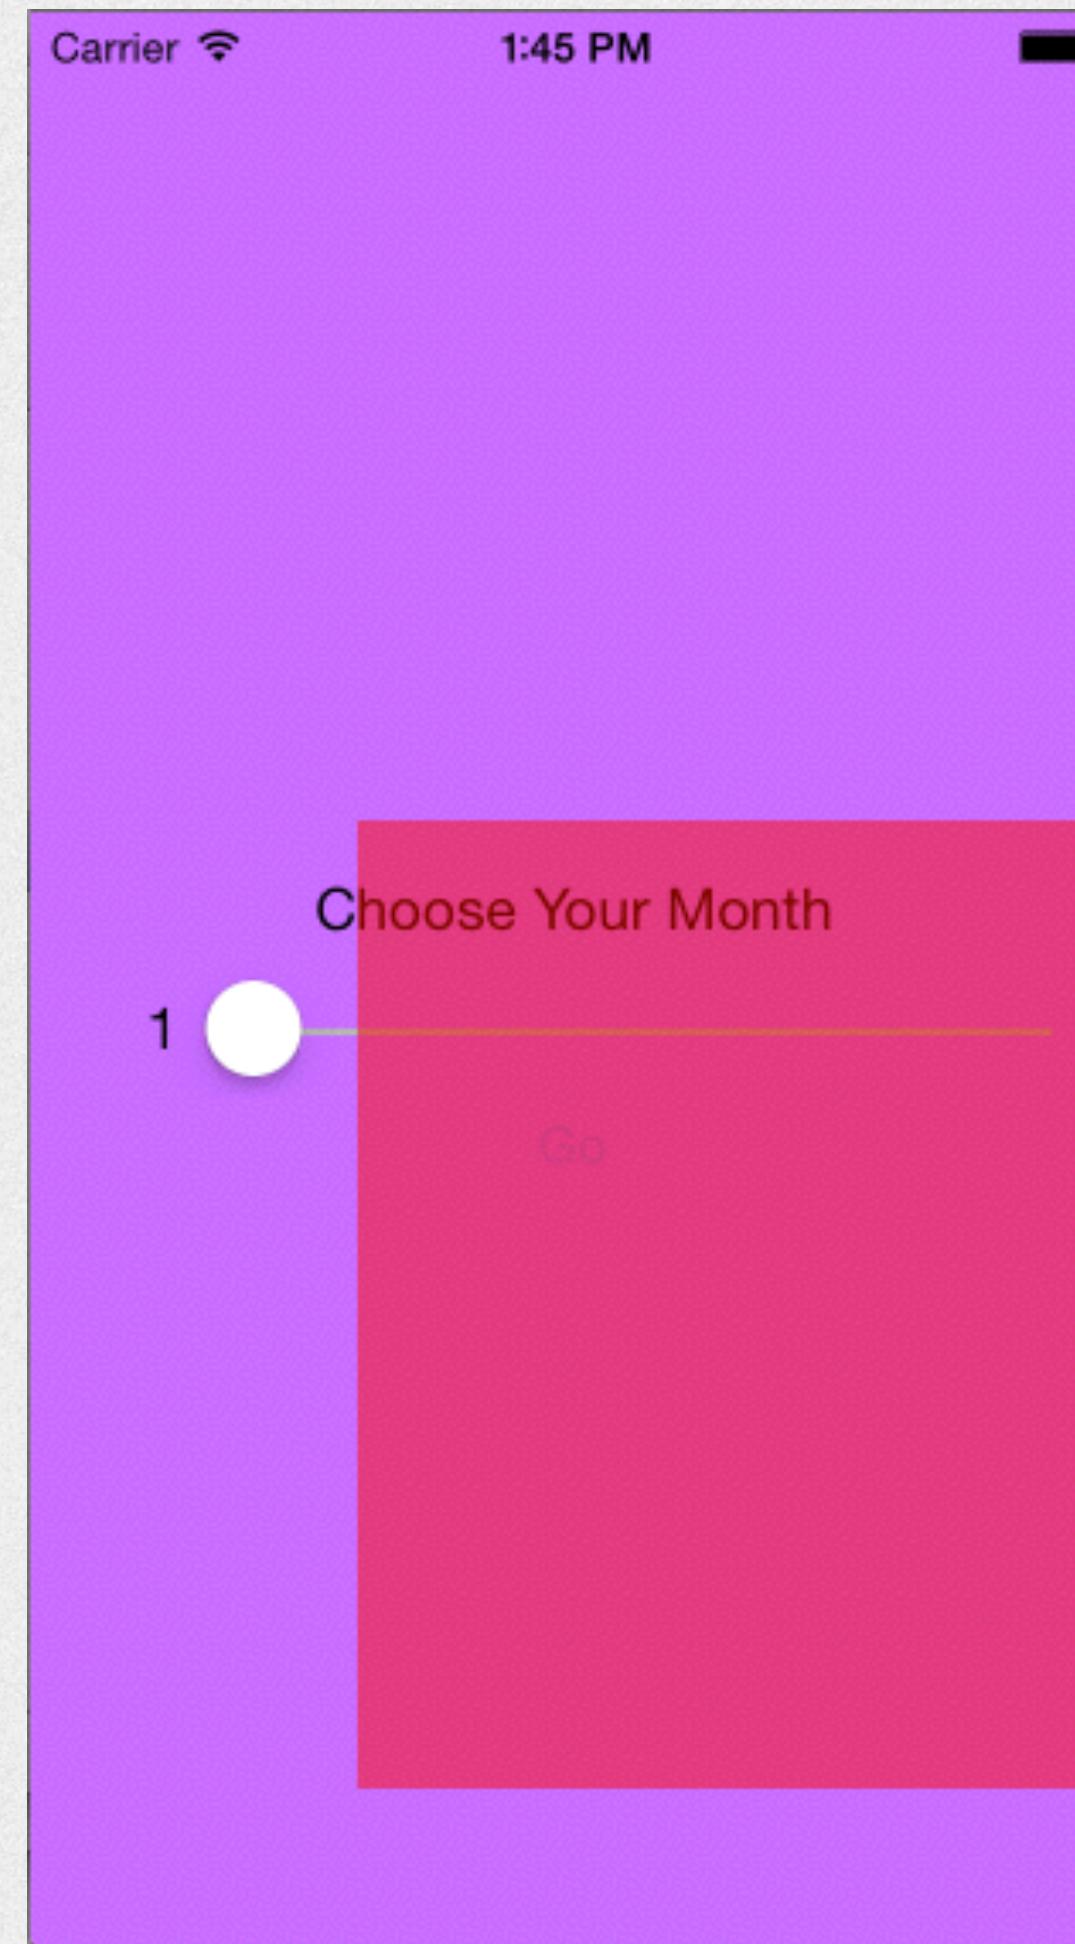

# border

```
(lldb) border self.view  
(lldb) border self.goButton  
(lldb) border --color green self.slider  
(lldb) border --color yellow self.sliderLabel  
(lldb) border --color orange self.titleLabel
```

# mask / unmask

```
(lldb) mask self.misalignedView
```

```
(lldb) unmask self.misalignedView
```

# pca

---

- ⚙️ Print the layer tree from the perspective of the render server

```
(lldb) pca
(layer [320 568 0] [0 0 320 568] [0.5 0.5 0]
 (transform [2 -0 0 0; 0 2 0 0; 0 0 1 0; 0 0 0 1])
 (rasterizationScale 2)
 (sublayers (array
   (layer [160 284 0] [0 0 320 568] [0.5 0.5 0]
     (backgroundColor #000000ff)
     (sublayers (array
       (layer [160 284 0] [0 0 320 568] [0.5 0.5 0]
         (rasterizationScale 2)
         ...
         
```

# presponder

---

- ⚙️ Prints out the responder starting from a specific responder

```
(lldb) presponder self.view
<UIView: 0x109e08120; frame = (0 0; 320 568); autoresize = RM+BM; layer = <CALayer: 0x109e081e0>>
  | <MainViewController: 0x1093240b0>
  |   | <UIViewControllerWrapperView: 0x109e03b20; frame = (0 0; 320 568); autoresize = RM+BM; layer = <CALayer: 0x109e02fe0>>
  |   |   | <UINavigationTransitionView: 0x109203b30; frame = (0 0; 320 568); clipsToBounds = YES; autoresize = W+H; layer = <CALayer: 0x109206940>>
```

# VS

---

- ⚙️ Interactively search for a view by walking the hierarchy.

## (lldb) vs self.view

Use the following and (q) to quit.

- (w) move to superview
- (s) move to first subview
- (a) move to previous sibling
- (d) move to next sibling
- (p) print the hierarchy

```
<UIView: 0x109e08120; frame = (0 0; 320 568); autoresize = RM+BM; layer =  
<CALayer: 0x109e081e0>>
```

# Misc Commands

---

- ⚙️ Force Core Animation to flush and repaint the UI

```
(lldb) caflush
```

- ⚙️ Quickly show and hide a view to quickly help visualize where it is.

```
(lldb) flicker self.view
```

# Misc Commands

---

- ⚙ Show and hide a view while the app is paused.

```
(lldb) hide self.view  
(lldb) show self.view
```

- ⚙ Print out a class hierarchy of an object.

```
(lldb) pclass rw.service  
RWWallpaperService  
| NSObject
```

# Demo

---

- ⚙ Demonstrate the various Chisel commands using the wallpaper browser app

# Challenge Time

---

```
(lldb) help -a
```

```
...
```

The following is a list of your current user-defined commands:

bmessage	-- Run Python function __FBDebugCommands_bmessage
border	-- Run Python function __FBDisplayCommands_border
caflush	-- Run Python function __FBDisplayCommands_cflush
fa11y	-- Run Python function __FBFindCommands_fa11y
flicker	-- Run Python function __FBFlickerCommands_flicker
fv	-- Run Python function __FBFindCommands_fv
fvc	-- Run Python function __FBFindCommands_fvc
hide	-- Run Python function __FBDisplayCommands_hide
mask	-- Run Python function __FBDisplayCommands_mask
