

iOS Animation with Swift

Part 17: Pop Spring Animations

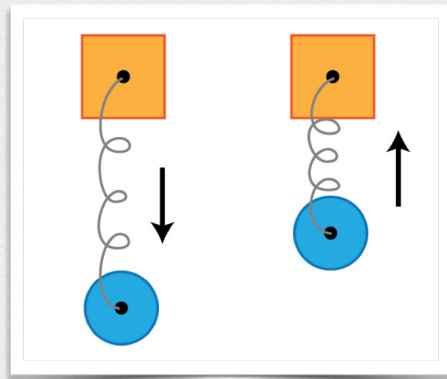

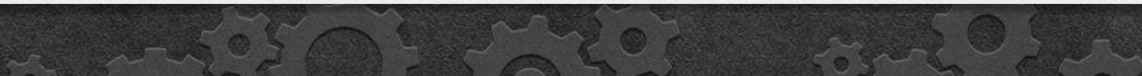

raywenderlich.com

POPSpringAnimation

```
let animation = POPSpringAnimation(propertyNamed: kPOPViewCenter)
animation.fromValue = NSValue(CGPoint: CGPoint(x: 160, y: 120))
animation.toValue = NSValue(CGPoint: CGPoint(x: 160, y: 280))
animation.springBounciness = 20
animation.springSpeed = 15
```
