# Segue Review

---

- ⚙️ Segue in storyboard +  
`contextForSegueWithIdentifier`
- ⚙️ Action method + `pushViewControllerWithName`  
or `presentControllerWithName`

# Table Row Segue

---

```
func contextForSegueWithIdentifier(segueIdentifier: String,  
                                inTable table: WKInterfaceTable,  
                                rowIndex: Int) -> AnyObject? {
```

# Table Row Action

---

```
func table(table: WKInterfaceTable, didSelectRowAtIndex rowIndex: Int)
```

# Demo

---

- ⚙️ Segue from table row to interface controller
- ⚙️ Pass context information
- ⚙️ Try the same thing all from code

# Challenge Time!

---
