Interface Controller Lifecycle

```
init(context: AnyObject?)  
func willActivate()  
func didDeactivate()
```

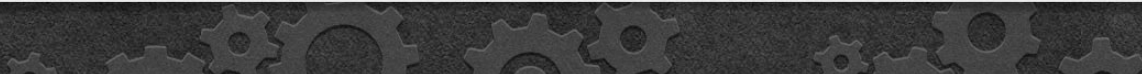

Pages from Code

- ⚙️ Dynamic set of pages vs pre-determined from the storyboard
- ⚙️ Custom order, set of interface controllers, and contexts

Modal Segue with Pages

```
func presentViewControllerWithNames(names: [AnyObject], contexts: [AnyObject]?)
```

Demo

- ⚙ Remove segues from storyboard
- ⚙ Use `presentControllerWithNames` to customize the list of controllers and contexts

Challenge Time!
